

Ruminto

Ecocal

PRODUCT PREVENTING CALCIUM DEFICIENCIES

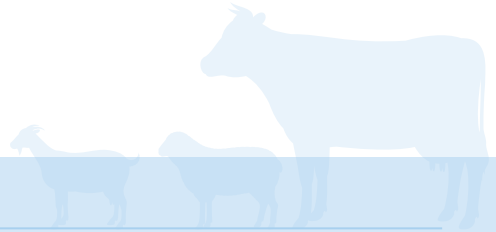

Quickly increases level of calcium
in the blood

- counteracts calcium deficits occurring after the calving
- reduces the cases of postnatal paralysis in the herd
- helps to prevent ketosis

Ecocal

- rapid onset of action
- ensures proper absorption of calcium
- prevents ketosis
- supports the body's immune processes

Active substances:

Calcium chloride

- absorbs quickly
- prevents hypocalcemia
- provides adequate blood calcium level

Vitamin D₃

- ensures proper absorption of calcium

Vitamin E

- has a positive effect on immune processes

Glycerin

- improves the palatability of the product
- is a source of energy
- helps to prevent ketosis

Species	Dose	How to use	How often
 COW	500 g	orally	1-2 times directly after the calving
 SHEEP GOAT	150 g	orally	1-2 times directly after the delivery
