

I have been working with Ruminta since 2020, and I must say their products have truly impressed me. As a distributor of farm products in the competitive Dutch market, I have seen firsthand the effectiveness of Ruminta's supplements and care products for cows.

Among the wide range of products they offer, the Ruminta boluses have been exceptionally effective. From Powerbol to Ketobol, Calcibol to Mastibol, Rumbol to Bufferbol, each bolus serves its purpose and delivers outstanding results. The market feedback for these boluses has been consistently positive.

Calfix and Diablock are two other gems in Ruminta's product lineup. They have proven to be incredibly effective in stopping diarrhea in calves, ensuring their healthy growth and well-being. Additionally, Ruminta's dippings have played a crucial role in preventing mastitis on various farms, contributing to overall udder health.

I am also impressed by Ruminta's range of hoof products, vitamins, and other essential supplements. Their commitment to quality and effectiveness shines through in every product they offer. It's reassuring to know that I can confidently recommend Ruminta to my clients, knowing that they will receive top-notch products.

Working with Ruminta products offered by company Ecofeed Polska has been a pleasure. They consistently deliver on their promises and provide exceptional customer service. I appreciate their dedication to supporting farmers and their commitment to improving animal health and well-being.
