

Dear partner!

BaltuVet is one of the biggest and most modern animal care and veterinary product and equipment wholesalers in the Baltics, with clients including both farming businesses and veterinary clinics and pharmacies.

We've begin cooperating with company Ecofeed since 2020. At the beginning we started with one product - Energymax Vit, being a mixture of pharmaceutical glycerine, propylene glycol and large amounts of vitamins. We succeeded to implement this preparation on Latvian market so in 2023 we decided to add to our portfolio also Ruminta's milking hygiene products.

So far, the cooperation with Ruminta products offered by company Ecofeed Polska has been a pleasure. Like every cooperation there had been some difficulties, but professional approach of their employee helped us to get rid of them and succeed to implement their products on Latvian market.

We are happy to be a partner of company Ecofeed and we hope to increase our business in coming years.
