**SUBJECT: Testimony**

Since 2021, we have been working closely with Ecofeed Polska and their brand Ruminta, and I must say it has been a remarkable experience. As an owner of company Farmatic d.o.o. working in the field of animal feed supplement industry, I was searching for effective and natural solutions to treat animals on dairy farms. Ruminta was one of the first brands, that we implemented in our product portfolio. Their products, such as Diablock, Calfix, or udder gels have been a game-changer for us. The effectiveness of Ruminta's products in tackling diarrhea in calves and providing udder care support is truly impressive. Our customers also liked their preparations against ketosis. Moreover, the price-quality ratio of Ruminta's products is good, making them a highly valuable choice for our business. I am very satisfied with our collaboration with Ecofeed Polska and would highly recommend Ruminta to anyone in need of top-quality animal feed supplements and care products.
