# ALU SPRAY

**Protective aluminium  
spray for wounds  
and abrasions**

**Creates a breathable  
protective layer on the skin**

**Protects the wound  
from dirt and external factors**

**Supports the natural  
skin regeneration process**

# Ruminta Alu Spray

is a protective aluminium spray for external use on wounds, abrasions, and irritated skin. After application, it forms a hydrophobic, breathable protective layer that shields the treated area and helps keep it clean.

## When to use Alu Spray?

- For minor wounds and abrasions
- After care procedures and skin injuries
- To protect the skin from dirt and moisture

### Directions for use:

Spray onto the cleaned area until the skin is fully covered.

### Key ingredients:

**Aluminium**

**forms  
a protective  
barrier**

**Volatile components**

**ensure even  
coverage  
of the skin**

**Packaging:** 200 ml spray bottle
